

Mahesh Hudali

Technical Lead — Principal Software Engineer — SDE-3
+91 7892922820 — rdhudali@gmail.com — LinkedIn
Bangalore, India

Professional Summary

Hands-on Technical Lead with 8 years of overall professional experience, including 7+ years in IT/software building, scaling, and owning platform systems in product-driven teams. Experienced in turning fragmented and high-complexity systems into reliable, scalable, and maintainable solutions, with strong exposure to cross-team collaboration across frontend, backend, and platform boundaries. Skilled in software architecture, project execution, and team leadership — including prioritization and resource management.

Enjoy working on unclear problems, simplifying complex flows, and making pragmatic technical decisions. Seeking challenging problems at scale and opportunities to contribute both technically and strategically.

Core Skills

- **Languages:** JavaScript, TypeScript, SQL
- **Frontend:** React.js, Redux, Micro Frontends (Single-SPA), PWA, WebView
- **Backend:** Node.js, Express.js, GraphQL, NestJS
- **Architecture:** Micro Frontends, BFF Pattern, Platform-Oriented Architecture, Service-Oriented Systems, Distributed System Fundamentals
- **Styling & UI:** TailwindCSS, Material UI, Bootstrap, Figma
- **Build & Infra:** Webpack, Babel, Jenkins, Docker, Nginx
- **Monitoring & Analytics:** Datadog, CleverTap, Firebase, Coralogix
- **Leadership:** Team Mentorship, Hiring, Performance Management, Roadmap Planning
- **Process:** Agile/Scrum, Jira, GitHub PR Reviews

Professional Experience

Technical Lead <i>mPokket, Bangalore</i>	Oct 2025 – Present
--	--------------------

- Leading a team of 9 developers and 2 QAs, accountable for delivery, execution quality, and technical direction of the Web platform.
- Owning system-level architecture decisions and acting as the single point of accountability for Web platform design.
- Stewarding backend-facing contracts for the Web platform, including API design reviews, data contract alignment, and integration standards.
- Driving platform-level concerns such as scalability, reliability, error handling, and performance for business-critical financial flows.
- Coordinating cross-team dependencies across backend, mobile, and product teams to ensure predictable and high-quality delivery.
- Leading sprint planning, roadmap execution, and technical prioritization.
- Establishing and enforcing engineering standards around code reviews, documentation, observability, and quality gates.
- Mentoring engineers, supporting hiring, and growing future technical leaders within the team.

Principal Software Engineer (SDE-3)
mPokket, Bangalore

Jun 2024 – Oct 2025

- Took hands-on ownership of the Web platform, scaling it from basic login and onboarding flows to full feature parity with mobile applications.
- Designed and implemented Micro Frontend architecture (Single-SPA), enabling modular ownership and independent scaling.
- Built and delivered core business journeys including UI Revamp, Onboarding, Repayments, and Disbursements across Secure and Unsecured loan products.
- Implemented PWA support for iOS users, unlocking a new user segment with minimal operational overhead.
- Built and owned critical WebView flows consumed by mobile applications, making Web a core dependency in high-value financial journeys.
- Authored HLDs and LLDs for frontend systems and BFF layers.
- Implemented multiple BFF layers to aggregate and shape backend data for frontend consumption.
- Actively participated in production incident debugging and resolution for high-impact releases.

Software Development Engineer II (SDE 2)
Aerchain (Agillos E-Commerce Pvt Ltd), Bangalore

Jan 2023 – Jul 2024

- Worked on a large-scale Source-to-Pay SaaS platform powering approximately 50% of company offerings.
- Took ownership of frontend architecture quality, balancing delivery speed with long-term maintainability.
- Built a shared component library covering 70% of UI use cases, improving consistency and development speed.
- Solved complex workflow and UI problems in close collaboration with Product and Design teams.
- Conducted code reviews and mentoring, raising the overall bar for frontend engineering.
- Participated in architecture discussions, hiring interviews, and requirement breakdown sessions.

Software Developer - Full
Inflect Technologies Pvt Ltd, Bangalore

Nov 2021 – Jan 2023

- Built React and SVG-based visualization libraries for ML-driven dashboards used by enterprise customers.
- Diagnosed and resolved performance bottlenecks, improving key dashboard modules by 70%.
- Owned analytics instrumentation across web, backend, and mobile platforms to enable data-driven decisions.
- Designed reusable authentication modules adopted across multiple product lines.
- Worked in a full-stack, production-heavy environment, strengthening system-level thinking.

Fullstack Developer (Client: PhonePe)
Innoventes Technologies Pvt Ltd, Bangalore

Feb 2020 – Nov 2021

- Translated ambiguous business requirements into scalable React components and Node.js APIs.
- Designed and maintained proxy/BFF layers to orchestrate multiple backend services, ensuring reliable, secure, and consistent APIs for frontend consumers.
- Owned CI/CD pipelines, deployments, and production stability.
- Collaborated with QA and AppSec teams to ensure secure and reliable releases.

- Acted as a go-to problem solver during high-pressure releases and critical production issues.

UI/UX Developer

Jul 2019 – Jan 2020

Digital Fusion Trips Pvt Ltd, Bangalore

- Designed and developed user-centric interfaces using React.js, HTML5, and CSS.
- Led UX research, persona definition, and workflow design.
- Translated design concepts into responsive, production-ready user interfaces.
- Built early confidence in owning features end-to-end, from design through delivery.

Quality Engineer

Jan 2019 – Jun 2019

Remidio Innovative Solutions, Bangalore

- Established a quality-first mindset through SOP creation, audits, and root-cause analysis.
- Applied quality gates early in development through reviews, CI/CD checks, and delivery standards.

Project Engineer Trainee

Feb 2018 – Jan 2019

Bharat Electronics Ltd (BEL), Bangalore

- Worked in a mission-critical defense manufacturing environment using SAP PP.
- Coordinated with manufacturing, planning, and quality teams for on-time execution.
- Built strong foundations in structured execution, accountability, and systems thinking.

Education

Bachelor of Engineering (Mechanical Engineering), Bangalore Institute of Technology, VTU 2013 – 2017
